Education

B.Tech. (CSE)	Phonics University of Roorkee, Haridwar	3 rd Year - Under Top 5
XII (UK Board)	Atal Utkrisht Government Inter College, Roorkee	Under Top-10 - 2022
X (CBSE)	Cantt Board Sr. Sec. School, Roorkee	Topper - 2020

Experience

Backend Developer Intern | Perpex

- Developed and maintained RESTful APIs using Django REST Framework to support core application features.
- Optimized database queries, improving data retrieval times by 15%.
- Implemented secure authentication middleware for user data handling.

Open Source Mentor | GirlScript Summer of Code (GSSOC)

- Mentored 10+ student contributors on best practices in Python and Django, reviewing code and providing constructive feedback.
- Facilitated a collaborative environment, leading to the successful merger of 30+ pull requests into main project repositories.

Projects

ISS Overhead Notifier | Python, API Integration, Automation

(Project Link)

- Built a Python script that tracks the International Space Station's real-time position and sends email alerts when it passes overhead at night
- Integrated multiple APIs (open-notify, sunrise-sunset) to verify location and daylight conditions, ensuring notifications only during visible flyovers
- Automated continuous monitoring with scheduled checks, demonstrating end-to-end system integration and event-driven notification logic

Stock News Alert System | Python, APIs, Financial Automation

(Project Link)

- Engineered a real-time monitoring system using Alpha Vantage, NewsAPI, and Twilio to track stock performance and send SMS alerts for significant price changes
- Automated data fetching, percentage change calculation, and news aggregation to deliver concise, actionable financial insights via SMS
- Designed with configurable thresholds and secure API key management, enabling personalized, scheduled alerts for informed decision-making

Multivariable Regression for Housing Price Prediction | Python, Pandas, Scikit-learn, Matplotlib

(Project Link)

- Developed a regression model to predict Boston housing prices, achieving an R^2 score of **0.85** through rigorous exploratory data analysis (EDA) and feature engineering.
- Utilized Pandas for data cleaning and Matplotlib for data visualization to identify key price-influencing factors.

Note: for more prove of work, please visit my **Portfolio**.

Skills

Programming Languages: Python, Java, C++, C

Web & Framework: Django, Django REST Framework, Flask, JavaScript, HTML5, CSS3, Tailwind, RESTful APIs

Databases & ORM: MySQL, SQLite, Django ORM

Data Science & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Plotly

Tools & Platforms: Git, GitHub, Docker, VS Code, PyCharm, Jupyter Notebook, Selenium, BeautifulSoup

Achievements

- Special Talent Recognition Award (2020)
- NCC 'A' & 'B' Certificate Holder, National Cadet Corps | Senior Under Officer
- Winner, Atal Tinkering Science Exhibition - Cantt Board School, Roorkee
